[(b)(1) Sec 1.4(a)]

1.A.1. (TS//SI//REL TO USA, FVEY/FISA) [(b)(1) Sec 1.4(a)]

[(b)(1) Sec 1.4(a)]

1.B. (S//REL TO USA, FVEY) AREA OF OPERATIONS. The area of operations includes [(b)(1) Sec 1.4(a)]
[(b)(1) Sec 1.4(a)]

1.C. (U) ENEMY.

1.C.1. (S//REL TO USA, FVEY) ISIL's primary cyberspace initiative uses the Internet as a conduit to target global audiences to recruit and radicalize. Specifically, ISIL creates media to provide legitimacy to their self-proclaimed caliphate and to recruit sympathizers to convert to their ideology and join their cause. ISIL's messages are primarily meant to appeal to [(b)(1) Sec 1.4(a)] however, ISIL tailors their messages to attract others globally. In addition to its Internet messaging, ISIL provides media to the local populace in [(b)(1) Sec 1.4(a)] [(b)(1) Sec 1.4(a)]

1.C.2. (U) ISIL also uses media to threaten and intimidate. For example, ISIL's gruesome videos are meant to intimidate and strike fear into their adversaries and local populace to reduce their will to fight and ensure local populations remain compliant with ISIL rule. ISIL messages that threaten foreign governments are meant to deter foreign military intervention or demand ransom for foreign hostages.

1.C.3. (S//REL TO USA, FVEY) ISIL's high quality propaganda has effectively enabled ISIL's personnel recruitment from susceptible local and foreign Muslim populations. In addition to the recruitment of personnel for combat, ISIL actively [(b)(1) Sec 1.4(a)] [(b)(1) Sec 1.4(a)] ISIL is struggling to attract a sufficient number of recruits with the [(1) Sec 1.4] expertise needed to provide governing and social services; however, those current struggles are not likely to deter ISIL from maintaining these aspirations.

1.C.4. (TS//SI//REL TO USA, FVEY) ISIL has [(b)(1) Sec 1.4(a)] media establishments responsible for the group's strategic media and propaganda production [(b)(1) Sec 1.4(a)] (b)(1) Sec 1.4(a) These outlets serve as the group's primary arms for communicating leadership and religious guidance, as well as highlighting activities across ISIL-controlled territory. Although these establishments [(b)(1) Sec 1.4(a)] create specific products. In order to (IOT) make the highest quality media products, central media developers have access to multiple media sources. This includes raw and finished media files developed by the [(b)(1) Sec 1.4(a)] media establishments, access to the Internet to download media files, and the ability to record and create their own organic media files.

1.C.5. (TS//SI//REL TO USA, FVEY) ISIL employs cadres of personnel with varying levels of expertise and responsibility to acquire, develop, administer, and maintain information networks utilizing both private and public Internet infrastructure. These individuals are responsible for the management of data communications projects, such as the creation and establishment of websites and mobile applications in support of (ISO) ISIL media, as well as the creation and management of network projects designed to
